

Centafold 100 Residential Sliding & Folding Door Systems

Door Specifications

- Maximum Door Weight: 27kg
- Door Thickness: 20-40mm
- Maximum Door Width: 600mm
- Maximum Door Height: 2500mm
- Track Dimensions:
28mm (w) x 30mm (h) Galvanised Steel
- Track Dimensions:
31mm (w) x 30mm (h) Aluminium

Door Construction:

Solid blockboard, louvered or flush panelled construction with adequate provision for fixing end pivots and hangers. Swing leaves may not be used. 1½ or 3 ½ leaves may be hinged together with end half leaf pivoted adjacent to jamb. For increased stability, bottom guides and floor channel are recommended on door leaves over 450mm wide, 15kg weight or 2.1m high. Minimum leaf thickness 30mm.

Hardware Specifications

- Anodised aluminium or galvanised steel top track can be fixed directly to soffit or side fixed with the use of brackets

- Hangers have steel bodies with nylon wheels and ball bearings which are lubricated for life
- Top track can be soffit fixed or side fixed with additional brackets
- Bottom guiding can be omitted on doors less than 450mm wide which are under 15kg and less than 2100mm in height to achieve a clear threshold
- Side fixing brackets included in track sets
- Nylon wheeled hangers for smooth operation
- Concealed hinges included within tracksets

Centafold 100

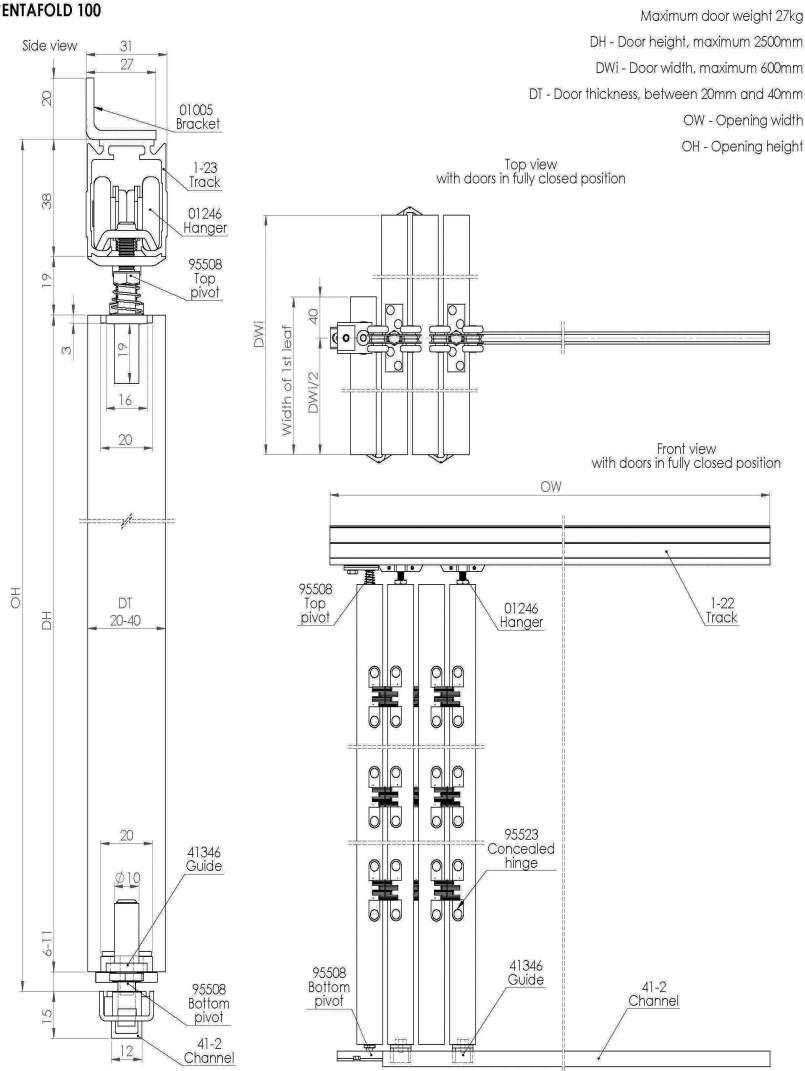

Residential Sliding & Folding Door Systems
